

REGULAR SESSION OF TOWN COUNCIL HELD

The town council recently held a regular meeting in the town office. Among the subjects brought up was the paving of the open easement of the Palace Hotel. The council were informed that the Agriculture Association did not wish to dispose of any of the acre surrounding the fair grounds, Councillor W. Thompson suggested using cable, the same as is used on the highways. He stated the Blackfoot Municipality had got some wire from the Turner Valley oil well drillers at a very small cost. The rest of the council thought this a good idea and the secretary was instructed to make inquiries regarding the purchase of some of this cable.

The public works department are to attend to the matter of burning off the grass at the cemetery. They hoped to be aided by the boys scouts. A tank of water will be on hand for emergencies.

The questions of horses and cows straying around the streets was next brought up. Nothing was done about it as it was figured that this matter would adjust itself.

Ted Krause's station was found to be in a park area according to law should be agricultural district, whereas it was really commercial district. By-law 247 was introduced. By-law is to amend by-law 220 signing and building by-law. It was read three times and passed.

It was announced that some people allow irrigation water to run to waste. The secretary was instructed to write Edmonton and find out if anything could be done about it.

The rough condition of the main street of the town was discussed at length. The secretary was instructed to write Mr. Graham, government engineer and see if the work of putting this street in excellent condition could be done by the man who runs the maintenance on the main highway. This machine could easily turn up the street and level it off.

A letter had been received from the Calgary Power Co. explaining the reason for the service charge particularly in regard to the motor at the reservoir, which is only in use during the summer months.

The secretary advised the council that the health inspector had paid his annual visit. His report had not yet been received. He had visited the dairies and found one not up to standard.

The subject of highway concerns came up. The secretary stated he had obtained information from several towns regarding the way they handled the service of motorists. Some had by-laws, others didn't. The Attorney General's department advised that the town had no authority to pass such a by-law. Motorists could be prosecuted under section 43 of the Vehicles and Highways Traffic Act. The information was ordered filed.

The following accounts were passed for payment: Crowsnest Lumber Co. \$2.30; R. S. McQueen \$7.00; E. Woods \$8.00; L. Michael \$89.50; MacCallum & Sutermeister \$19.80; Municipal News \$2.00; Municipal News \$2.00; B. F. Graham \$5.00; Gleichen Hardware \$3.15; B. W. Harrison \$9.00; G. Desjardins \$3.00; M. Murray \$12.95.

FARM TRACTOR WIN AIR BALLOON TIRES MAKES NEW RECORDS

Enthusiasm of farmers for pneumatic tire tractors is making tractor manufacturers seek higher speeds to make the tractor more valuable for hauling or travel, and for use as an all-purpose farm machine. The most interesting speed performance is the recent official AAA record of 35.4 m.p.h. for five miles made by a tractor at the Wisconsin State Fair grounds AAA race.

MEADOWBROOK WINS SOFTBALL CHAMPIONSHIP

The playoff for the championship of the local softball league was completed Sunday when Meadowbrook won the honor from the Hot Shots. Two games were played, the first on Friday evening when the Hot Shots won but in the double header played Sunday afternoon Meadowbrook won both games. By winning the playoff series Meadowbrook becomes the perpetual champions of the local softball league. They also won the trophy donated by President Michael for the softball league. They were the first to win which must be played for annual trophy.

Meadowbrook is a remarkable team for sticking together. They are composed of farmers and have been playing together for the past three seasons, and rarely do any of the members fail to turn out to play. Not with the town teams who are frequently short some of their regular players. Meadowbrook deserves to win such cups as they have shown superior playing ability by winning both halves of the series.

Sunday evening a smoker took place in the Legion Hall when Meadowbrook was officially presented with the mugs. By President Michael. At the same time a farewell party was given to Ted Robertson, manager of the Hot Shots, who is moving to Brooks, Thursday.

Pres. Michael occupied the chair and in his usual happy manner presented the trophy to the team. He then called upon everybody present to make a speech. Much singing by all present with J. Eggers at the piano helped to while away the hours.

TOO FAST DRIVING

There has been quite a number of comments on the speed at which some of the young people drive their cars round the streets. The present social demands scarcely seem to justify this terrific rush to get from here to there.

In fact, quite frequently there appears no object, except to the end of the block as fast as possible. If they were on missions of life or death, or carrying tidings of great joy, their actions would be more understandable. But as everyone knows, they have all the time there is, to get where they are going, and viewed in a large way, their errands are perhaps not particularly important. So there is really nothing to justify the rush. Their violation of the rules of safety, good judgement and common sense is in fact, in many instances, involuntary. They probably do not realize that they are regarded as danger spots in community welfare.

Past driving within the limits of the town holds grave danger. On every street, little children are moving thoughtlessly to and fro and must be safeguarded. On every street others are crowding and they have as much right to their privileges as the cars.

side the track oval. Mr. Schroeder then unswitched the plow and turned the tractor over to Frank Brito, famous race track driver who was one of the leaders in the Indianapolis race this year. The crowds were amazed to see the tractor streak down the straight stretches at times reaching 40 miles an hour.

A new four speed transmission development combined with the pneumatic low pressure tire development made possible this unheard of speed. At the end of the run, Frank Brito asked how he liked the ride, and it was just like driving a passenger automobile.

THOUSANDS DUCKS DEAD AT STOBART LAKE

At Stobart Lake thousands of ducks are lying dead along the shore and in the water. Hearing that Art Bremner, Namska, had stated there were many birds lying dead there the Call reporter went up Sunday and investigated and found the statement was only too true. Most of the birds that were on the shore dead were lying on their breasts with their bills tucked underneath. Examination of these recently dead showed bleeding from the nostrils. Not being an expert in bird work could find no other signs. Jack Duck on shore appeared very sick and could not lead up. In trying to catch him he waddled back to the water feebly flapping his wings and getting into the water he slowly swam away. This light breeze blowing at the time ruffled his feathers badly, showing he had no control over them. Another bird which we were unable to catch, struggled very feebly and was bleeding from the nostrils. After setting him down in the water it made no attempt to swim away. Nearly several ducks showed evidence of having been partially eaten by hawks. A little further up the lake two dead hawks were found. One question then was would the ducks eat grasshopper poison and what it kill them?

At two places 50 dead birds were counted in a distance of 100 feet, another place 30 were counted in the same distance. Birds were laying dead along the shore as far as one could see. The lake has a shore line at about four miles. Estimating 30 ducks dead for every 100 feet of shore line makes a total of about 6,700. The dead birds must, easily double and treble this number as the lake is covered for many acres with tall sedge grass and in this countless flocks could be dead unseen. The figures are staggering, but go and see, figures are staggering, but go and see.

THE ALBERTA WHEAT POOL CONDUCTING WHEAT SURVEY

The Alberta Wheat Pool is conducting a survey of wheat being grown in all districts where clubs are located. Department of Agriculture field men in judging the groups and scoring the club plots for purity of variety are also making purity of variety counts on the wheat of the farmers. The system followed is that the judge when he has finished the judging plots proceeds to the adjacent fields on the farm and prepares a purity of variety report on the wheat grown.

By this method the Alberta Wheat Pool hopes to obtain a fairly accurate idea of the quality of the wheat being grown by wheat producers throughout the province. The wheat club number 46, being located in districts extending from Bow Island in the south to Grande Prairie in the north. The total membership approximately 750 punier farmers and around 700 farms will be reported upon in the survey. The Wheat Pool has been for the past few years taking an active interest in the education of educating the junior farmers in the province in the benefits of growing pure varieties of grain. It is believed that the information introduced this year of testing the run of the crop on the various farms which the juniors will give further credit to the movement for seed improvement as well as providing valuable information.

A large number of the Gleichen High School pupils have been in Calgary writing examinations. Last Friday some night students from here wrote on different subjects. This week more will go up and write.

Last week one of the government road graders tore up and repaved a couple of blocks in length of roadway on the town's main street. The lumps and holes have now been smoothed out and the street looks much better for the treatment.

PRODUCES WHEAT WEIGHING 67 LBS. BUSHEL

J. A. McArthur and Frank Corbell are this year producing extra heavy wheat on their respective farms. Each of them planted Revard wheat last spring and when they delivered the results of their labors to the Pool Elevator here, managed by W. C. Halsehead, were amazingly surprised to find that their wheat weighed 67 pounds to the bushel. This wheat was grown on unfertilized land and was not irrigated. This is something of a miracle after the hot dry summer experienced this season, and it is no doubt due to the excellent farming methods practised by these two gentlemen.

Self-regulation of motion pictures by producers to conform with ordinary standards of decency and good taste is a matter of concern to the public. Not to mention the fact that the industry has been recently at Vancouver where he arrived from a short stay at Banff and Lake Louise. Clark Gable was another movie star who visited at these famous mountain resorts.

All Ontario district brother officers of Norman M. McMillan, chairman, took part recently in a presentation to Mr. McMillan of a letter of appreciation from the Royal York Hotel, Toronto, on the occasion of his presentation as assistant to H. J. Humphrey, general manager, eastern lines of the railway.

Unhappily, more washed and unsoiled, after an all day motor trip through the Canadian country east of Quebec City, motored recently into the Ancient Capital and put up at the Chateau Frontenac. The wife of the President of the Dominion States, the following day, took in the sights of Quebec from the high seat of a catfish, the quaint one-horse vehicles characteristic of Quebec City.

Cattle jumped to fourth place in bacon exports to Great Britain and put up at the Chateau Frontenac. The wife of the President of the Dominion States, the following day, took in the sights of Quebec from the high seat of a catfish, the quaint one-horse vehicles characteristic of Quebec City.

There were increased retail sales in Canada in May as compared with April and the index number of the Dominion Bureau of Statistics rose from 81.7 to 85.5. Hardware had the best showing, the increase being from 75.8 to 77.2.

A spare blue-lined figure which to thousands of passengers through Vancouver in the past seven years represented a symbol of friendliness in a strange city will no more be seen around the wharves and terminals of the Canadian Pacific railway in the Coast city since Albert Charles Pearson, terminal passenger agent for the company, died there recently.

With rising prices for wool and a vast Chinese market for wheat and other commodities, Australia is rising steadily to a greatly improved economic position. The Warwick Fairfax, managing editor of the Sydney Morning Herald, Australia's oldest newspaper, a traveller recently on the Canadian Australasia tour.

ECHOES OF GLEICHEN TWENTY YEARS AGO

A most successful box social and entertainment took place in the Cluny School house on Saturday. It was organized by Mr. and Mrs. Gardiner, assisted by the ladies of the district for the purpose of equipping an organ for the Sunday school at Wheatfield school house. Miss Emma Jones who has been spending her vacation at her home at South Camp, returned to Calgary. The ladies of the Presbyterian Church gave a most successful lawn social and entertainment on Mr. Goodenham's lawn, setting the sum of \$72. The beautiful lawn at the agency was lighted for the occasion and the large crowd present throughout the night. The ladies of the Presbyterian Church gave a most successful lawn social and entertainment on Mr. Goodenham's lawn, setting the sum of \$72. town this week visiting former friends. Mrs. Elder states that Mr. Elder is meeting with good success in Black Diamond and has struck plenty of gas. She is hopeful that someday he will return to Gleichen and continue his boring for oil. . . . W. Stuart and Co. have sold out their Gleichen lumber yard to the Berestische Sawmill Co. and the Crown Lumber Co. There is a movement on foot throughout the province to amalgamate the junior yards in the different towns. Miss Down left yesterday to accept a position in Vancouver school. . . . The generous grant offered by the Alberta government for standing fields of seed grain though the Gleichen Agricultural Association have been announced by the Hon. Mr. Lacombe, who was appointed judge by the Department of Agriculture to be as follows: M. Bolinger; J. E. Osterander and Wm. Walsh. . . . After spending the summer holidays at home, Miss Isabelle Goodenham left Sunday to renew her studies in Mount Royal College. . . . Clark Bros. have once more brought horses to Gleichen. Once more they can show prizes that prove they possess the very best Clydesdale horses in Canada. They carried off seven first, grand championship and other honors at the Edmonton Exhibition. . . . The duck shooting season opened up on Saturday Aug. 26th. D. Vigor of Banff spent a couple of days in town, this week visiting his son F. C. and his daughter, Mrs. D. C. Wahart. . . . J. A. Ramsey, of the Busy Store has added to his grocery side one of the celebrated Shearer-Gillette counters, which not only makes a beautiful display of goods but keeps everything perfectly clean. He has also installed an up-to-date candy show case, which makes an attractive display and places temptation in the way of the small boy, by which he has increased his candy sales 100 per cent.

It was indeed a great shock to the people of Gleichen and district to learn that Altemus A. F. Larkin had passed away in the Holy Cross hospital, Sunday morning. . . . Saturday the Hon. Dr. W. J. Roche, Minister of Interior will visit Cl. . . . Monday, the first of steel on the Gleichen-Shopar C. P. R. cut-off was laid, and those in charge say there is little to prevent rapid progress. . . . The teaching staff of the school for this year is composed of H. McKay, who comes highly recommended from Frank, Alta. Miss Dickie, who was so successful last year and Miss Aylett who recently arrived from England. . . . F. C. Gaudreau has returned from a trip to Edmonton. . . . Miss Kate Goodenham has been ill with diphtheria since last Friday. . . . Rev. Karmie of Bankerville, Calgary, will occupy the Presbyterian pulpit next Sunday morning.

Ernest Burke, a brother to James and Robert Burke, of Queenstown arrived from Oregon with his family a few days ago and is staying with his brothers until he finds a suitable place to buy or rent. . . . Ellen Giambeck of Queenstown was thrown off her horse a short time ago. Among the injuries received was a dislocated shoulder. Dr. Os attended the case.

TWO FEATERS NEXT SATURDAY

ZANE GREY'S "UNDER THE TONTO RIM" They had to tell him he was tough before he got started with his guns and flint. His visit with "Tonto" and Quick with the gun and quicker with a kiss.

A Sea-Walled City

Rugosa On Dalmatian Coast Noted For Its Scenery

The Dalmatian coast has been for several years a byword for beautiful scenery. Before that it was one of the cockpits of Europe. Looking at it from the sea, the rugged coastline does not seem worth capturing, and yet Venice, the Turks, Napoleon, the English, the Austrians, have all had a go at it. Rugosa, which is now given the ugly modern name of Dubrovnik, is an extremely scenic spot. I have never seen. Once upon a time its inhabitants were the proudest in the world. They formed a tiny republic which stood for no nonsense from anyone. They were like a miniature Venice. Today, Rugasians are still proud to style themselves that way. The men are of extraordinary height and handsome, and the girls make you stare with admiration. Many of them wear the national dress with long flowing skirts, the open necked blouses, and strange little red bonnet-like plates. The main street used to be an arm of the sea, but now is paved and ends in a splendid view of the sea. The houses are tall and handsome. Every few yards there is a long narrow exciting alley-way leading straight up to the seaside at the top of the town. The town of Rugosa has the oldest chemist shop in the world. The chemist's assistant is a monk in the cowl and sandals of the Franciscan Order. They shop goes back to 1810, but you can weigh yourself on the weighing machine just as if you were at Brighton. —London Evening Star.

Want Special Privileges

Saskatchewan Rural Municipalities Would Grant Discounts In Order To Collect Taxes

The Saskatchewan Association of Rural Municipalities is urging upon the provincial government the granting of special privileges for the granting of discounts as an inducement to the collection of arrears of taxes similar to that granted under the terms of the Tax Arrears Consolidation Act.

Under existing legislation municipalities not within the scope of the Tax Arrears Consolidation Act may, by by-law, grant discounts of 4 per cent. up to November 1, and 2 per cent. up to December 15. They may not compromise for current taxes and arrears with the consent of the minister.

Hon. Howard McConnell, Minister of Municipal Affairs, intimated that a move to grant the same discount to municipalities not within the scope of Act as those which have come under the act, is to extend the privileges of legislation without the responsibilities.

Morse Code For Motorists

Means Of Communication With Other Drivers Is Idea Of Inventor

It is perhaps good news that motorists are to have a grammar of tooting. They are not going to make less noise, but their roles is to have more precise and subtle meaning to their horn. The vocabulary with the horn is to be greatly enriched. But these things are going to happen only if, and insofar as, the ingenious Czechoslovakian inventor gets his way. What he plans is to teach drivers to use a Morse code so that they can talk to each other.

Motorists are a competitive lot. Unfortunately there is all too little scope for other pretensions, because the prices of cars and their powers are not secrets. But the owner-driver of the small car will be able to outshine the best in will and rhetoric and the reputations can be made. —London Times.

Must Have Diploma

Unskilled slinging knicks will be forced out of business in Italy under a new Premier Benito Mussolini's latest decrees. It sets up a committee of experts to look into the qualifications of Italy's voice men. Those who cannot produce a diploma from a recognized academy must shut up shop.

Stranger—Nobody in this village seems to have a good word for anybody else.

Native—Well, you see, in a little community like this most everybody is more or less related.

Nearly \$1,000,000 worth of timber has been destroyed in the Philippines in ten years by farmers who illegally clear public lands by burning off the trees.

Butte, Montana, stands on what is called the "richest hill in the world," because of the production of copper, lead, zinc, silver and gold.

More Specimens Needed

Four Arctic Birds In Collection At Royal Ontario Museum

Bird specimens, numbering 250, collected along the Hudson Bay coast between Churchill and Hudson Point, are ready for shipment to the Royal Ontario Museum, to be added to the collection of 10,000 used for research and for biological studies. The collector, Arthur C. Twomey, of Edmonton, student of the University of Alberta, who undertakes this work as a private enterprise, has had many specimens accepted by the museum during the past three years. A selection will be made from the shipment when it arrives.

L. L. Snyder, ornithologist at the museum, says the collection of birds from the sub-Arctic is still small. The birds used for studies are kept in steel cupboards and placed in long trays. Several members of a species together for comparison and examination for biological studies. The birds appear in natural form, but are, in fact, merely the skins with feet, beak and feathers intact. The skins are turned out with stuffed cotton to provide a body.

The birds from Hudson Bay will not be on exhibition, but share the same steel cupboards with the birds that already contain close 20,000 birds. Of the 768 specimens which belong to North America, the Royal Ontario Museum has a fair representation, but it is a real need for larger collections of the Arctic birds to make more complete the knowledge of Canadian species.

Mr. Twomey will spend the remainder of the summer, it is learned, in collecting other specimens found in Northern Alberta. He is one of several ornithologists who have made collections for the museum.

World's First Black Rose

No Sign Of Shading Appears In Fragrant Petals

Flowering under the watchful eyes of numerous park attendants, the world's first black rose, pride of the great Stangerhouse nursery, is drawing throngs of visitors to this small Hants town.

The unique flower, the creation of which was recently announced, is a cross between two extremely dark varieties of roses—"Chateau de Clos Vougeot" and "Lord Cardigan." It is of a velvety deep blacked hue, so dark—especially in dry, hot weather—that it may be described as black. Fragrant petals show no shading whatever.

Some 400,000 roses in 9,000 varieties are on display. Most of the credit for this achievement belongs to 60-year-old Professor Ewald Dyring, supervisor of the gardens, who is affectionately known as the "rose-venerator" (father of the roses).

Good Crop Of Hay

Thousand Tons Cut At The Pas During Two Weeks

More than 1,000 tons of hay were cut for local use during two weeks in the Carrot River Triangle, all within a 15-mile radius of The Pas, according to estimates made there.

Some 2,000 acres have been operating in the area. Hay is good this year. High water did not affect it. It is of better quality than for many years past, haymen say.

A. St. Gerard cut 400 tons, Transport Limited 200, and others including Frechette, Allard, as well as sections of the Carrot River Valley, smaller lots.

The Indians of The Pas reserve have also garnered enough for winter fodder.

ON BOARD THE "EMPERESS OF BRITAIN"

"That's a good one," John Nelson (right), president of Rotary International, may have been saying of George Stephens, traffic vice-president of the Canadian Pacific, as the empress-maid snipped this about the liner "Empress of Britain," just before the boat docked at Southampton, Thursday, August 24. Or it may have been the other way round—it was not a sound comment. Both are abroad in the performance of their duties, Mr. Nelson at a regional conference of Rotarians at Lausanne, and Mr. Stephens to visit Canadian Pacific headquarters in Great Britain.

SHE LOST 32 lbs.

New Frocks No Longer Worried Her

"How did she lose that 32 lbs. of fat?" is what you will be asking. Let me tell you herself.

"About 18 months ago I weighed 178 lbs.—which I can assure you annoyed me very much. Everything seemed a worry to me, especially new frocks. I would go to the store, and I was advised by a friend to try Kirsche's Diet and I am very glad I did so. During the first ten months I lost 28 lbs. of fat. Now, for the last 4 months my weight has been 146 lbs., and I feel much better in health. I have all my weight tickets to substantiate my statements."—(Mrs. J. M. P.)

Kirsche's Diet helps the liver, cleans the blood, and reduces excess fat, proportionately balanced, found in the waters of these famous European spas used by generations of fat people to reduce weight.

Experiments in Taxation

Record Of English History Shows Very Few Things Escaped

There have been many strange experiments in taxation in English history. Henry the Eighth taxed the poor and graduated the tax according to the position of the wearer. The Sheriff of Canterbury was constrained to pay the sum of three shillings for the privilege of wearing whippers. Elizabeth likewise put a similar tax on every beard of over a fortnight's growth. Elizabeth was bent on making the country of a religious turn of mind, and all who stayed away from church on Sunday rendered themselves liable to a fine. In 1665 it was decided that births should be taxed. The birth of a child to a Duke cost the proud father thirty pounds in taxes, while the coming of a commoner child into the world was made the occasion of a tax of two shillings. Bachelors and widowers were compelled to pay for the privilege of a single blessedness. It was William Pitt who instituted the window-tax. In the reign of George the First it was necessary to have a license in order to sell hats. There was a tax on hair powder and a tax on watches and clocks. In the reign of George the Third a duty of two shillings and sixpence was imposed on bricks. At a later period in the same reign bricks were divided, for the purpose of taxation, into common and dressed bricks, and a duty on each kind of brick was regulated according to its size.

Paid For Grumbling

Man In England Earns Good Living Finding Fault

A London man earns a living by finding fault with the city and its people with everything. One day he went into a big tea shop and found that the shape of the teacups they used was inconvenient. He was impossible to get out of them without spilling the tea. So he wrote to the company about it and the cups were changed. He wrote to the London Underground and told them that passengers could alight at a certain station without presenting a ticket. Upon another occasion he asked the City of London in the West End of the city was not working properly. He told the company owning it that anyone standing on the other side of the street could not read it, and it was changed. He has been successful in a life-long habit. If ever his life was a waste of time he would be able to write to the owner about it. He merely used to do it as a matter of principle, but when he was out of a job he suggested that if his criticisms were of any use he should be paid for them. Now he makes a handsome income from being a grumbler!

Has Massive Program

Russia Planned Big Increase In Production This Year

With the launching of the second Five-Year Plan, Russia has outlined a programme of massive production for this year. The big increase is planned in agriculture, electricity, coal, oil and other metals, machinery, chemicals and in general manufacturing. Thus, whereas in 1932 the far was five or ten cents. Finally the disgraced contractor picked up the Scotsman's suitcase and tossed it off the train, just as they passed over a bridge. It landed with a splash.

"Moon," screamed Sandy, "isn't it enough to try and overcharge me, but now you try to drown by little boy?"

Back taxes are being paid in wood in Carlinia, Austria.

LUNCHEON TOMATOES

Two cups cooked tomatoes; 5 cap sweetened condensed milk; 2 cups dry bread, broken in pieces; 1 teaspoon salt; 1/2 teaspoon pepper. Grated carrots, 1/2 cup. Heat tomatoes and milk to boiling point. Add sweetened condensed milk and stir until well blended. Remove from fire, add bread and seasonings. Cover lightly two hours. Pour into serving dish, sprinkle generously with grated cheese. Serve at once. Serves six.

Victory For The Lawyer

A solicitor, who had been asked out to dinner and was delicately "pumped" for legal information by his host, was a bit for "advice." He was the host responded with a demand for payment for the dinner eaten by the solicitor. Equal to the occasion, however, the latter promptly asked for a preaction for selling wine without a license.

This Clock Is Different

A bronze lion, twelve feet high, which will roar at noon, and a cock six feet high, which will crow at sunset, are features of a huge new clock erected in Messina, Sicily.

One Good Roll

Deserves Another

This is what men say when they make the acquaintance of Ogden's fine cut cigarette tobacco.

It rolls more easily—that is the first thing that you discover—then light up, and learn the rest of the good news. Sweeter, more fragrant, mellower—all any smoker could ask in a fine cigarette.

That's why so many men have tried it—liked it—stuck to it. Use Chantrelle cigarette papers with it and you will get a still better smoke.

Tea Is Old Beverage

Beverage Used Long Before Beginning Of Christian Era

Tea was known long before the beginning of the Christian era, and though by the thirteenth century it was a universal drink in China it was not until nearly four hundred years later that Europe began to hear of it. The first European to mention tea was Mr. Wickham in 1615. He wrote from Japan to a friend asking for three silver porringers from which to drink tea. Tea was first sold publicly in England in 1657. It fetched from 25s. to 50s. a lb. in the leaf. It was also sold in liquid form, made, so the vendor said, according to the directions of the most knowing merchants and travellers in the East. The year 1839 was a date never to be forgotten in the history of the British Empire, for it was the year in which Empire-grown tea was first sold in England.

Air Is Essential

A great need of the soil for crop growth is that of an air supply. Every one realizes the importance of air, but this is not so in the case of plants is not such common knowledge. Roots and vegetables mould and spoil very quickly if deprived of a circulation of air. As a result, therefore, should be ventilated to secure the passage of air throughout every part of it.

Canada As a Leader

Judged in terms of years, Canada is a very young country, and this fact is brought home to any one who studies the histories of the countries of Europe and Asia. Canada, too, while a country great in area, is of sparse population and in this respect is nowise comparable to the older countries of Asia and Europe, or of the United States.

But during its brief history, Canada and the Canadian people have achieved some truly great things and pioneered in numerous fields which have resulted in conferring outstanding benefits upon all mankind.

Our thoughts are turned in this direction by the centenary of one very notable Canadian achievement. On August 3, 1853, Canadians celebrated the passing of one hundred years since the first vessel crossed the Atlantic Ocean,—any ocean in fact,—steaming the whole way. It was a Canadian vessel, the "Royal William," built at Quebec and launched on April 29, 1831, and with Canadian built machinery over the cranks and shaft, when this epoch voyage, sailing from Pictou, Nova Scotia, on August 5, 1853, for London, England.

Other vessels had previously crossed the seas using steam to a certain extent, but no other vessel had ever made the voyage with "steam up" all the way. According to an account of this world-famous vessel appearing in the August number of the Canadian Geographical Journal, the "Royal William" actually established seven primary records.—Two Canadian records, three foreign records, and two world records.

The "Royal William" was (1) the first steaming steamer ever built in Canada; (2) the first steamer that ever plied on intercontinental affairs,—from Quebec to Halifax; (3) the first steamer that ever entered a U.S. harbor under the Union Jack; (4) the first steam transport in Portugal; (5) the first steam mail ship to cross the Atlantic; (6) the first steamship ever fired a shot in action under steam; (7) the first vessel that ever crossed any ocean steaming the whole way.

In celebration of the centenary of this last mentioned achievement the Canadian Government has issued a commemorative postage stamp which, unquestionably, will be greatly prized by stamp collectors throughout the world, and which will serve to bring to people in all lands knowledge of this great Canadian achievement of one hundred years ago.

This centenary of one of the world's greatest achievements reminds one of other outstanding achievements standing to the credit of Canada, young in years as this Dominion is in relation to other nations. Canadians can recall with pride that it was one of their countrymen, Andrew Graham Bell, who invented the telephone, thus giving to the world one of its most useful and widely used means of communication.

It was a Canadian who developed Marquis wheat, the effect of which has been to greatly extend the area of the world's surface in which wheat can be successfully grown, and it has been Canadians who have continued that work and developed still earlier ripening varieties such as Garret and Reward.

Great in area but small in population and wealth, Canada has built up in the Canadian Pacific Railway the greatest transportation system in the world. There are other great railways, other great steamship companies, other great telegraph, express and hotel companies, but no other company in the world combines all these services to the same extent and with the same world-wide ramifications as does the C.P.R. The inauguration of the Canadian Pacific was a tremendous undertaking for a mere handful of people in an enormous but undeveloped country, and its success is a tribute to Canadian initiative, energy and determination.

A Canadian gave impetus to the world's most wonderful agency of relief to the diabetic sufferers of the world, and which has prolonged the life of thousands of people afflicted with such disease.

Not in it is a small matter that through the efforts of a few millions of people they have made their country Canada the fifth trading nation in the world of trading nations, surpassed only by older, much more populous and wealthier nations.

There are many other fields in which Canada, during its brief history, has led the world, but neither time nor space will permit of extending this recital; sufficient has been said to establish the truth that Canadians have reason to entertain great pride in their country and in its achievements. Nay more, there is every reason why the people of Canada should have unbounded confidence in the future of their country. All nations through the world's history have suffered temporary reverses and setbacks; all have passed through periods of depression and hardship. But where the hearts of the people have been true, where they have not been given over to indolence and sloth, where they have maintained their virility and strength, where they have not been discouraged and demoralized, they have always risen above their troubles and reverses, and gone forward to greater achievements, greater glory, greater prosperity and happiness.

All Canada's past history provides an incentive and encouragement to the Canadian people of today. Opportunity has not ceased to knock at the door of Canada. The future holds more of promise than anything yet realized if our people seize the occasion when "Opportunity" does knock.

Land For Ships

Considerable backing has been given to Australia to the proposal recently made by Dr. Duhig, the Roman Catholic Archbishop of Brisbane, that the northern territory of New Guinea be handed back to Germany on condition that Germany contribute adequate ships for Australia's defence. Matters for the further German proposal in the Pacific were divided among Australia, Japan and New Zealand.

Radium contains a tremendous store of energy. Although it gradually breaks up only half of a given quantity will disappear in 1,500 years.

Any Looseness of the Bowels Is Always Dangerous

When the bowels become loose and diarrhoea, dysentery, summer complaint and other bowel troubles arise, immediate attention should be given and the diarrhoea checked before they become serious.

To check these unpleasant diarrhoeas there is a remedy in Dr. Fowler's Extract of Wild Strawberry, a remedy that has been on the market for the past 88 years and is as effective in its action as it is safe. A few doses is generally all that is required to give relief. Get it at your drug or general store just up only by The T. Milliken Co., Limited, Toronto, Ont.

Just Forty Years Ago

Food For Ottawa Banquet Cooked In Electric Oven

The world's first electric stove was used to cook the food for a banquet in Ottawa. It all came about as an advertisement for the advent of electric street cars, which were first introduced in Ottawa in 1892 by the young electrical contractor, Messrs. A. A. Ahern and W. W. Cooper. Critics declared electric cars could not be operated during winter in Ottawa—the passengers would become human iceles.

After successful demonstrations, a banquet was held in the old Windsor Hotel to honor a number of visitors who had flocked to the capital to see

The new electric heating equipment used in the cars. Their credulity almost failed them when they were told everything had been cooked electrically. They fairly gasped and just had to see. So they were shown the great electric oven, large enough to roast a one time half an ox with vegetables and dessert—a complete banquet. That was on April 3, 1893—just 40 years ago.

cup butter. Add to 1 beaten egg and beat until light. Add 1 cup lukewarm milk. Stir well. Add 1 cup Royal Yeast Sponge*, ¼ cup citron, ¼ cup raisins, ¼ cup chopped almonds, ¼ teaspoon salt, and enough flour to make

BENEATH THE MASK

The masks men wear
 To hide the truth from sight:
 The dark design of care,
 Creeping as the night;
 The masks of hate and fear,
 The sullen mask of pride;
 They don them year by year
 And shut themselves inside.

But I have learned to read
 The thoughts beneath the mask:
 The longing and the need,
 The courage for the task;
 And I have found behind
 Grim looks and visage cold
 Hearts that are true and kind,
 There dreams like flowers unfold.

Legacy For Canadian Doctor From Uncle In India

Dr. Reless Hudson attached to the unemployment relief camp hospital at Pelawawa, Ontario, has been visited, by a rich uncle in India, diamond valued at \$355,250. Dr. Hudson, who has been residing in Canada for 2 years, was formerly connected with the relief camp at Toronto and was previously in Western Canada. Dr. Hudson plans to again take up residence in Western Canada. News of his good fortune came to him in a letter from his uncle's lawyer in Perth, Scotland. Dr. Hudson is 38 years of age and was born in Scotland. He served with the Canadian forces in the Great War for three years. His father is dead, while his

E. Parkin, of Cumberland, B. C. has moved to Gleichen and will reside here in future.

Eric Collier, of the Bank of Commerce staff, has been transferred to Empress, Alberta. The Young People's Society held a party in his honor last Thursday evening and presented him with a Kodak. He was a popular young man and will be much missed by his many friends.

Adji, and Mrs. Sutherland have returned from their holidays spent in Manitoba.

Mrs. W. W. Brown of Lethbridge is visiting Mrs. C. R. McIntyre and numerous other friends in town.

Mr. and Mrs. Ardi, who farm north of Calgary, accompanied by three friends spent Sunday visiting at the home of Mr. and Mrs. F. Dew. They also paid a short visit to friends in town. Mr. Ardi, some 12 years ago was bookkeeper here for the Pacific Cold Storage Co.

Julius Little has purchased a new car through E. L. Blenden, the local Hudson-Cassidy man. Julius many friends, particularly the ladies think the car a beauty.

J. M. Teiford, of Vancouver, has been spending a few days looking after his interests here. He will leave for home Sunday. Mr. Teiford states that things are picking up at the coast and he looks for better times from now on.

Two Chinamen with a truckload of vegetables bound for Calgary, turned over on the main highway north of town Monday. The Chinamen escaped injury but the truck was badly smashed.

The Gleichen Flour Mill is steadily improving their premises. Just now they are building a garage at the rear of the mill where the trucks will be housed.

Beginning next Sunday, the first Sunday in September, the worship in the United church will be held in the evening. During the holiday months the church service has been held at 10:00 a.m. but next Sunday we shall return to the regular hours. Church School at 11:00 a.m. and evening worship at 7:30 p.m. We are to have with us Rev. H. H. D. Marr, B. A., of the Bible Society on his annual visit to our community. Gleichen has always been a strong supporter of this work and we always look forward to these visits.

The Indian put on a stampede Sunday at South Camp. Some excellent bucking was noticed and some good rides made, but many a brave bit the dust with a resounding blow.

Dave Wilson, the local poultry fancier has established something of a record for early laying birds. Four

months ago he hatched a set of heavy Buff Orpingtons, and last Thursday one of the birds started to lay. We are informed by local bird authorities that this is a record for birds of the heavy type. It is not uncommon for a lighter bird to start laying eggs at four months and even younger.

The Strathmore softball girls played the local girls here last Thursday evening. The visitors easily defeated the Gleichen girls.

Jack Lester and Henry Schaept spent most of last week trying to find a leak in the water pipes running to the Gleichen Hotel. The leak was finally discovered and patched.

CARD OF THANKS

The Sisters from St. Joseph School in Cluny, wish to extend their heartfelt thanks to all who so generously answered the call, and came to their help and rescue at the time when the fire broke out in the school a few days ago.

The kindness, charity and heroic devotedness of the people from Gleichen as well as from Cluny, on this occasion have been deeply appreciated and will never be forgotten.

SISTER JUSTINIAN,
Superior.

THE TWENTY-THIRD PSALM IN INDIAN SIGN LANGUAGE

The Great Father above is a Shepherd Chief. I am His, and with him I want not.

He throws out to me a rope, and the name of the rope is love, and He draws me to where the grass is green and the water not dangerous, and I rest and lie down satisfied.

Sometimes my heart is very weak and falls down, but He lifts it up and again and draws me into a good road. His name is Wonderful.

Exeeling, it may be very so, it may be longer, it may be a long time. He will draw me into a place between mountains. It is dark there but I'll draw back not. I'll be afraid not, for it is there between these mountains that the Shepherd Chief will meet me, and the hunger I have felt in my heart all through this life will be satisfied. Sometimes He makes the love rope into a whip, but afterward He give me a staff to lean on.

He spreads a table before me with all kinds of food. He puts His hands upon my head and all the "tired" is gone. My cup He fills till it runs over.

What I tell you is true, I lie not. These roads that are "away along" will stay with me through this life, and afterward I will go to live in the "Big Teepee" and sit down with the Shepherd Chief forever—Churchman's friend.
